MEASURES USED IN OVERALL APPROACH

Description of Measurements/Metric

Measurement/Metric	Description
Measure 1 – Electronic Health Information Export	ECP will demonstrate that EHI exports can be performed for a single individual and by population in a timely fashion. This will be done by reviewing system logs, testing with participants via zoom sessions to witness EHI export functionality being utilized within a production environment, in addition to internal testing.

Associated Certification Criteria with Measurement/Metric

Measurement/Metric	Associated Certification Criteria	Relied Upon Software (if applicable)
Measure 1 – Electronic Health Information Export	170.315(b)(10)(i) Single patient electronic health information export	N/A
Measure 1 – Electronic Health Information Export	170.315(b)(10)(ii) Patient population electronic health information export	N/A
Measure 1 – Electronic Health Information Export	170.315(b)(iii) Documentation	N/A

Justification for Selected Measurement/Metric

Measurement/Metric	Justification
Measure 1 – Electronic Health Information Export	This measure will allow us to observe successful conformance with EHI export functionality from the user perspective and internally.

Care Settings

Care Setting	Justification
Assisted Living	The product was developed for this type of care setting and all end-users utilize the same platform.

Expected Outcomes

Measurement/Metric	Expected Outcomes
Measure 1 – Electronic Health Information Export	Users will be able to export EHI for a single patient in a timely manner.
Measure 1 – Electronic Health Information Export	Users can export based on user permissions and roles.
Measure 1 – Electronic Health Information Export	Exports will be in an electronic/computable format. Results will be observed by client and internal testing which will demonstrate exports being in an electronic/computable format, with error rates being tracked and trended over time.
Measure 1 – Electronic Health Information Export	Export link documentation is available via publicly accessible hyperlink at all times.
Measure 1 – Electronic Health Information Export	Users will be able to export EHI for a single patient within the product at any time. Results will be observed by client and internal testing which will demonstrate single patent EHI export ability, with error rates being tracked and trended over time.
Measure 1 – Electronic Health Information Export	Users will be able to export EHI for a patient population.
